**EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

2. Authorization for this examiner's amendment was given in a telephone interview with Mr. Ulrich on 10-21-5.

3. The application has been amended as follows:

**-Claim 7, line 15,**

---a Location Server which is connected to--- had been inserted after the word "in".

**-Claim 7, line 16,**

---wherein a Service Administration Terminal is transmitting signals via said Packet Network to said CPE for changing an identity

of a switch for serving outgoing calls--- had been inserted after  
the word “port”.

**-Claim 15, line 17,**

“in said network” had been replaced with ---in a Location Server  
which is connected to said Packet Network---.

**-Claim 15, line 18,**

---wherein a Service Administration Terminal is transmitting  
signals via said Packet Network to said CPE for changing an identity  
of a switch for serving outgoing calls--- had been inserted after  
the word “port”.

#### **REASONS FOR ALLOWANCE**

4. The following is an examiner’s statement of reasons for allowance:

Regarding claim 7, the prior art fails to teach a method of establishing a connection between CPE (Customer Premises Equipment) and a serving switch

comprising the steps of “disconnecting said CPE from said Packet Network; reconnecting said CPE to said Packet Network at a different port connected to a different switch; and recording in a Location Server which is connected to said Packet Network an identity of said different port and different switch for completing calls to and from said CPE at said different port, wherein a Service Administration Terminal is transmitting signals via said Packet Network to said CPE for changing an identity of a switch for serving outgoing calls” which is considered in combination with other limitations, as specified in independent claim 7.

Regarding claim 8, the prior art fails to teach a method of establishing a connection between CPE (Customer Premises Equipment) and a serving switch comprising the steps of “wherein said Packet Network is connected to a Service Administration Terminal, further comprising the step of transmitting signals via said Packet Network from said Service Administration Terminal to said CPE for changing an identify of a switch for serving outgoing calls,” which is considered in combination with other limitations, as specified in independent claim 8.

Regarding claim 15, the prior art fails to teach in a telecommunication network comprising a Packet Network, a Home Switch and at least one Guest Switch, apparatus for establishing a connection between CPE (Customer Premises Equipment) and a serving switch comprising the steps of “means for detecting a disconnection of said CPE from said Packet Network; means for detecting a re-connection of said CPE to said Packet Network at a different port connected to a different switch; and means, in a Location Server which is connected to said Packet Network, for recording an identity of said different port and different switch for completing calls to and from said CPE at said different port, wherein a Service Administration Terminal is transmitting signals via said Packet Network to said CPE for changing an identity of a switch for serving outgoing calls” which is considered in combination with other limitations, as specified in independent claim 15.

Regarding claim 16, the prior art fails to teach in a telecommunication network comprising a Packet Network, a Home Switch and at least one Guest Switch, apparatus for establishing a connection between CPE (Customer Premises Equipment) and a serving switch comprising the steps of “wherein said
